## EV Charging at the Langstone Cliff Hotel

The Hotel has 2 x 7Kw EV Chargers located in the upper car park adjacent to our Biomass Boiler.

The units are operated via a downloadable app which can be obtained by scanning the QR code located on the notice beside each machine or by scanning the code on the right.

Once the app is installed, plug the car into the charger and scan the QR code with the app to commence charging.

The App will pre-authorise £20.00 on your card when it is used, when the vehicle has completed charging any unused credit will be refunded immediately. If more than £20.00 is required then additional pre-authorisations will be made and any credit unused will be refunded on completion of charging.

The current charge is **60p per Kwh** this reflects the current charges for electricity to commercial customers, at present (July 2022) these are around 45p per Kwh plus VAT = 54p per Kwh, these charges are increasing weekly.

**Unlike domestic customers there is no cap on electricity charges to commercial customers.**

The Installation of these charge points has cost in excess of £2,500.00.

**CHARGE ASSIST**

Go to [chargeassist.app](http://chargeassist.app)  
or scan to charge
